

My name is Bilikis Olanshile Olayinka, I am a student of MSC HRM aspiring to be an NUC delegate. Studying politics and being a member of the student union while also spearheading the committee for the entire graduating class of 2014 during my undergraduate level has brought me into close contact with deciding and deliberating on the best way to bring forth the views and ideas of the people, by not only representing them and airing their views but also being a true representation of the dynamics in culture, race, gender, beliefs of the majority of the community that make up the students of this great school.

The goal is not to stop at mere representation but ensuring priority are set right and effectively followed to create a positive community of equality and inclusivity aimed at ensuring students continue to get the best out of their learning experience on all campus.
