

Hi! I'm Emma Duffy, a 4<sup>th</sup> year student looking to become a Full-Time Officer. Over the last four years at GCU, I have been very heavily involved within the Student's Association and I feel this makes me qualified to represent you, the students.

If elected, I plan to achieve four main objectives:

I will strengthen communication between teaching staff and the students. I feel communication between students and staff is vital to a successful module, even more so through this pandemic. While many have been good at communicating, some have struggled. I plan to fix this by working with the staff to find an effective way to spread vital information, either through an email or weekly bulletin on GCULearn through modules.

I will improve the accessibility of library resources. Due to the pandemic, it has become much more difficult to access the valuable resources available at the library. Teaching has moved online, but the same cannot be said for the library resources. Where the library offers many different resources, I feel that during this time more of them should be available online as many students cannot get onto campus. It is important that as many resources as possible are available through an online service.

For our return to campus, I will strive to make it cleaner and more environmentally friendly. To do this, recycling should be more accessible and, therefore encouraged. I will increase the amount of recycling bins we have on campus. This will ensure greater recycling and a cleaner, greener campus.

We are a smoke free campus, but adequate smoking shelters have not been provided. By introducing at least one more shelter, we ensure the safety of our students and cut down on litter outside the campus as each shelter will have adequate disposal bins for cigarette ends.
