//////////Manifesto Points:

Improved Health & Wellbeing Services

Being a student during the Covid-19 pandemic has been difficult for everyone. In order to keep students happy and healthy during their studies, it is vital the Health and Wellbeing services can keep up with the high demands, as well as being able to assist every student with their needs. As Full Time Officer, I would work with the Wellbeing team to **improve the counselling services** available, as well as bringing awareness to the roles of **mental health first aiders on campus**.

Improved Timetabling Structure

Every year, students complain about their timetables. Whether it be having too many lectures back to back or having large gaps between classes, I will work closely with the University to **improve the timetable structures**, making it **easier for students** to fit studying, jobs, and leisure around their education.

Improved Student Union

Currently, our Student Union has limited vegetarian/vegan/gluten-free options. I am campaigning to **update the menu items**, while also introducing **fairer prices** to reflect what students want. I also propose **updating the interior** to create a better atmosphere, and **serving food later** so that once our Re:Union Bar & Grill opens again, students have an affordable and attractive place to socialise.
