

Dear Sirs /Ma,

My name is Olomo Julius Oluwarotimi, LLM. I am currently doing my masters in International Business Management. I am a Nigerian and I speak and write English and Yoruba fluently. But I can also read and speak little French; I am well abreast with Latin. I love reading, playing chess and Lawn tennis.

When I came into the United Kingdom, I faced some challenges, which I believe others in my situations also faced:

Firstly, when I arrived, I resided in an apartment that gave me emotional pains. My flat mates were something else. Sometimes I had to ask myself what really I have done to this people again. This almost affected my studies. Hence I think the student Union should ensure that students are well lectured on ways of selecting apartments that will be beneficial to them. I know that the school encourages school accommodation. But it looks like it is only for the rich .It is too expensive for us who are coming from average homes. Hence, I will try and ensure that the school gets accommodations for different category of students. Where I currently reside I pay 300 pounds per month, if the school can do something similar this will help a lot of students coming from average homes like me.

Finally, I realized when I used the library that some books are taken by students for a whole month. And this books are so important to my courses .I keep checking every week and the librarians keep saying it is not available I felt so bad. Firstly, why should the school have just one copy of a text book for a class of 30 to 50 international students? This is absolutely bad.

I remain Olomo Julius Oluwarotimi.

So, please vote for me
