Speech by Olomo Julius Oluwarotimi

Time Target: One Minute

Motto: Together we can make a difference.

Hello everyone! I am Olomo Julius Oluwarotimi (O.O J) and i am running for the full time officer position for 2021 for this prestigious institution. I am a postgraduate student of international Business Management .I was a Public Relation Officer and Assistant Chief Judge of the Faculty of Law the student Union of Benson Idahosa University which was s my almamata. Am a lover of social events and sports; i will love to put my leadership and Servitude experience to work for all of Glasgow Caledonian University Students; servitude because i am actually going to serve your interest for the common good because together we can make a difference.

Certainly, i intend coming out for the voiceless to be given a voice, and for many positive students ideas which are hidden under the carpets to be brought open for implementations; all for the common good because together we can make a difference. Irrespective and prior to this i intend carry out the following if elected:

Affordable school accommodation for all: After i got my admission into this prestigious University as an international student i was very glad, but when i was notified of my accommodation fee,i felt sad.As a student from a Average home, after spending so much on my academic fee i was left so rich with nothing.I had to get an accommodation outside the school premises, with individuals who cared less about studies. I kept telling myself oh i wish i could afford the accommodation fee,oh i wish i could have the academic atmosphere,I wish someone had educated me on accommodation know how. This is one of the reasons i am coming out for this responsibility. Certainly, the school can provide accommodation for 300 pounds per month,yes they can! but if we don't voice this out they will presume that all is well. After all it is for the common good and we the average,self sponsored or privileged students should share of the common good, because together we can make a difference.

Job Security pre and post Studies: For me,it took me quite a time to get a job as a student. And for some of my friends who got the job early they were paid so little, capitalised on by agents .after all who can they report to that, in the same place they work ,with people who are less up to them they pay difference is much. For many of us from average homes, or who are self sponsored this job is so important while studying.

I have dream ,that a student can get a job via the student union platform before travelling down from his home country.

I have a dream, that through the student platform alot of carrer jobs will be available even for graduate students..

I have a dream that the school accommodation will be made available for all class of students

IT IS JUST A DREAM, BUT WITH YOUR VOTE CERTAINLY, IT WILL BE A FACT.

I need your vote

I remain Olomo Julius Oluwarotimi (O.O Julius)
