

My name is Thomas Etta, I am applying for the full time officer position at GCU, I work for Ruhe Global Resources and I have over 2 years' experience working closely with students to achieve their educational dreams to study in the best universities globally. If elected, I promise to address the following issues; First, I can help with **accommodation options** for **students with dependents** to settle in the UK. Most times students coming with families would not prefer the campus accommodation. However, no matter the locations you are coming from, there will always be the **availability of accommodation for families** if I am elected. Second, I can help support students seeking for **placement options** into organizations after their programme. For students that cannot find placement into an organization on time, this may cause your placement year to be cancelled. For example, the organization I work for can employ students from different faculties. I also have **collaborations with companies** that are willing to provide placement options for students. Third, I can help integrate with GCU to allow student take part in **professional certifications** that will help you gain relevant **additional skills** needed in a real life working environment. Finally, I can actively work closely with the VISA team at GCU in order **to effectively support the visa application process** for both EU and International students. As a class rep, I heard many challenges that some of my colleagues are facing with the new visa rules and long processing time for CAS. I promise to ensure that all international students are able to travel once it is permitted. Please vote for me to work as a full time officer in order to achieve these four point's agenda. #Vote for endless possibilities - Thomas Etta.
